Guest Speakers

Experiencing Agile

Maria Matarelli, PMP, PMI-ACP, CSP, helps you discover the benefits of Agile and learn by doing in an Agile Project simulation. Learn techniques to cut through extra process and get results. Whether you are adopting Agile, assisting your organization in change and leadership alignment, or a project manager that simply knows evolution is the key to the complete project manager, Agile skills and experience is the next step. Learn key elements for increasing your speed to market, experience the benefits in a project simulation, and discover Agile techniques that you can begin to immediately apply in your work environment.

The Guide to Lean Enablers for Managing Engineering Programs

Deb Secor, Principal Program Manager at Rockwell Collins, showcases how her Lean Engineering Accelerated Planning (LEAP) team successfully applied best practices from *The Guide to Lean Enablers for Managing Engineering Programs* during development of an aircraft remote-visioning system. *The Guide* was released in 2012 by the Project Management Institute (PMI), the International Council on Systems

Engineering (INCOSE) and the Massachusetts Institute of Technology (MIT). Learn from Deb how to apply lean enablers at the outset of the planning process to drive substantial savings across the life cycle of a program.

Building, Marketing, and Measuring a Value-Add PMO

Tom Mochal, President of TenStep, Inc. and winner of the PMI 2005

Distinguished Contribution Award, enables you to put all the pieces together to make sure that Project Management Office (PMO) work provides value, the value is measured, and the value is communicated. Do not let your organization's PMO be viewed as an overhead organization that is a barrier to swift project completion. Tom will teach you how PMOs

can help projects execute better, faster, and cheaper.
